React Projects Beginner-Advance

Art by
Antonio Mello

Beginners

Weather App

A weather app may sound complicated, but it really isn't. Most weather data is just pulled straight from an API

Calculator App

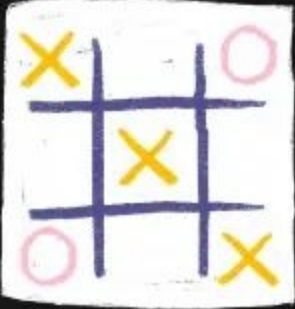

A calculator app is also a great place to start because it's so simple and fun to build

Expense Tracker

Your app should allows user to add expenses, categories them and show some insights like how much expenses went towards food, education etc

Beginners

Tic Tac Toe

We all know what tic tac toe is , Building it with React is really a fun idea

All in One Clock

Build a Clock with Timer and Stopwatch , all in one

Intermediate

Crypto Tracker

Use a third party API to fetch all the crypto currency data with all the details available

Blog App

An app to where user can upload blogs with pictures

Advanced ToDo App

A todo app where you can add todo's , delete them, mark them done , or importantly rearrange them

Intermediate

Mediation App

The meditation app helps you to stay calm and compose , research for the techniques you offer on the app

Management Systems

An app which manages books , inventory, students data, covid data or anything

Advance

Real Time Chat App

An app where user can create accounts and communicate to anyone who's already registered on the app in real time

Dashboard

Dashboard is nothing but part of an app or a stand alone app which displays various forms of data using graphs, charts for the admin

Clone

Build popular Clones like Netflix, YouTube, Spotify, WhatsApp etc , pick one

Advance

User Activity Tracker

Simply a tracker but to track every activity of the user, also provide various features like editing tracked items, deleting and all

Video Chat App

An app which provides users to attend or make a video call and take it further by adding sharing links to join the call like zoom meeting app
