Tabnine

Tabnine helps you generate code from comments, complete whole lines and functions, and even real-time midline code completion as you write code.

The screenshot shows the Tabnine website homepage. At the top, there is a navigation bar with the Tabnine logo, links for Pricing, Get Tabnine, Enterprise, Code Privacy, Docs, Blog, and Learn more, and a Log-in / Signup button. The main headline reads "AI assistant that speeds up delivery and keeps your code safe". Below this, it states ">30% code automation • Private, Secure & Compliant • Adapts to your codebase". There are two main buttons: "Get Tabnine" for Developers and "Talk to an Expert" for Enterprise. The background features a stylized city skyline at night with a robot character in the center. At the bottom, it says "Trusted by millions of developers worldwide" and includes a feedback prompt: "Help us improve by sharing your feedback." with a smiley face icon.

Code GPT

Code GPT is GPT inside VS Code. It's a multifaceted VS Code extension that delivers a bunch of AI features powered by Open AI API.

The screenshot shows the Code GPT website landing page. At the top, there's a navigation bar with links for Pricing, Documentation, and Contact Us, along with Sign In and Join the Beta buttons. The main heading reads "The future of software development powered by AI." Below this, a subheading says "Become a 10x developer with our always free AI-assisted pair programming." There are two buttons: "Quick Install" and "Join Discord". To the right is a large image showing the Code GPT interface within a VS Code editor. At the bottom, there are three statistics: "790k+ downloads", "4.5/5 star rating", and "16 languages".

05.

Bito AI

Bito AI comes with a diverse use case. You can use it to generate code, ask for syntax, generate test cases, code explanations and much more.

The screenshot shows the Bito AI website homepage. At the top, there's a navigation bar with the Bito logo, links for 'What's New', 'Docs', 'Pricing', 'Sign In', and a 'Get Started' button. Below the navigation bar, the main headline reads 'Finally! AI that understands your code' followed by 'Improve code performance' and '10x faster with ChatGPT'. A 'Get Bito for free' button is positioned to the right. Below the headline, there are three award badges: 'Highest rated AI app' from Product Hunt, 'Highest rated AI app' from JET BRAINS, and 'Product Hunt #3 Product of the Week'. The text 'Boost Productivity by 31%' and 'Trusted by 100K+ developers at the world's best companies' is displayed. At the bottom, there's a row of logos for Salesforce, Microsoft, Google, Uber, accenture, Apple, Qualcomm, and amazon, followed by a 'Help' button.

We raised \$3.2m from the CTOs of Paypal, LinkedIn, and Etsy!

07.

Readable

Readable is an AI comment generator VS Code extension that helps you comment your code without writing a single comment yourself.

The screenshot shows the Readable website interface. At the top, there's a navigation bar with links for 'Readable', 'Home', 'Discord', and 'Purchase', along with a 'Log In' button. The main content area features the headline 'Never Write Comments Again.' followed by the text 'Automatically generate comprehensive + customizable comments for your source code in a matter of seconds.' Below this, there are icons for VS Code, JetBrains IDEs, and a 'Get Readable' button. A code editor window displays a Python function 'def binaryify' with pre-generated comments. The code is as follows:

```
1 @cuda.jit
2 def binaryify(image, amt, height, width):
3     # x coordinate of the pixel
4     x = cuda.blockIdx.x * cuda.blockDim.x
5     # y coordinate of the pixel
6     y = cuda.blockIdx.y * cuda.blockDim.y
7     if x <= height and y <= width:
8         if image[x][y] > amt:
9             image[x][y] = 255
10        else:
11            image[x][y] = 0
```

Below the code editor, it says 'The comments shown above have been pre-generated.'
