Frameworks

CSS Frameworks (Pick one)

Tailwind

Bootstrap

Materialize

Bulma

JS Frameworks (Pick one)

React

Angular

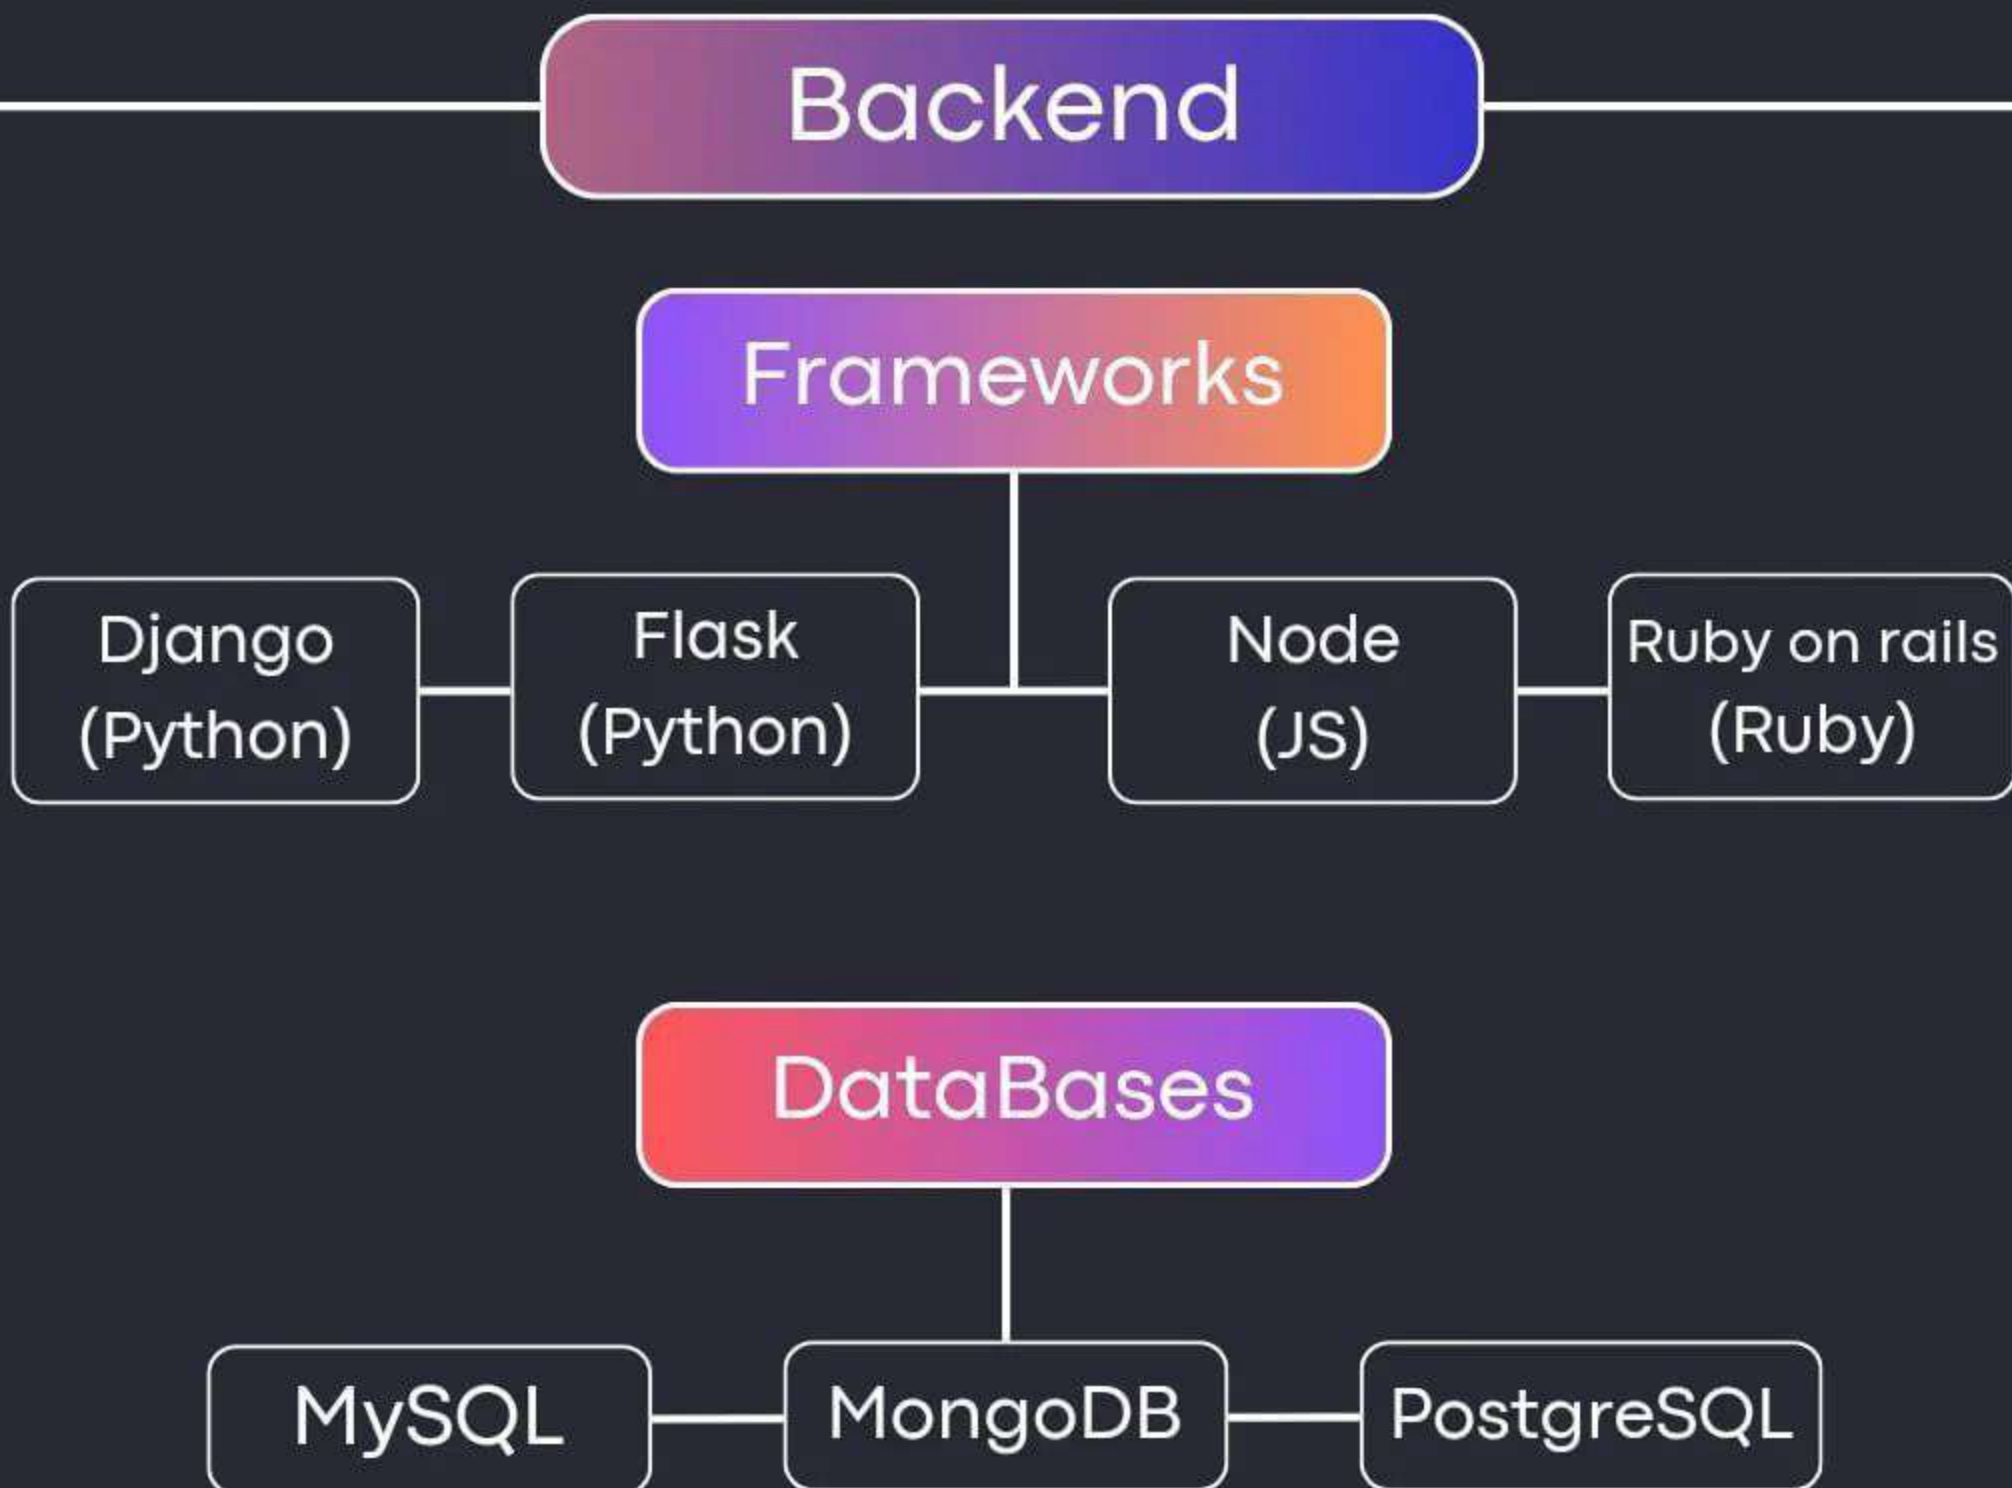

Vue

Resources to Learn

- Codevolution (YouTube)
- Angular University (YouTube)
- React official Docs
- Vue official Docs
- Vue Mastery
- Codecademy

Officially Made By @coding.stella

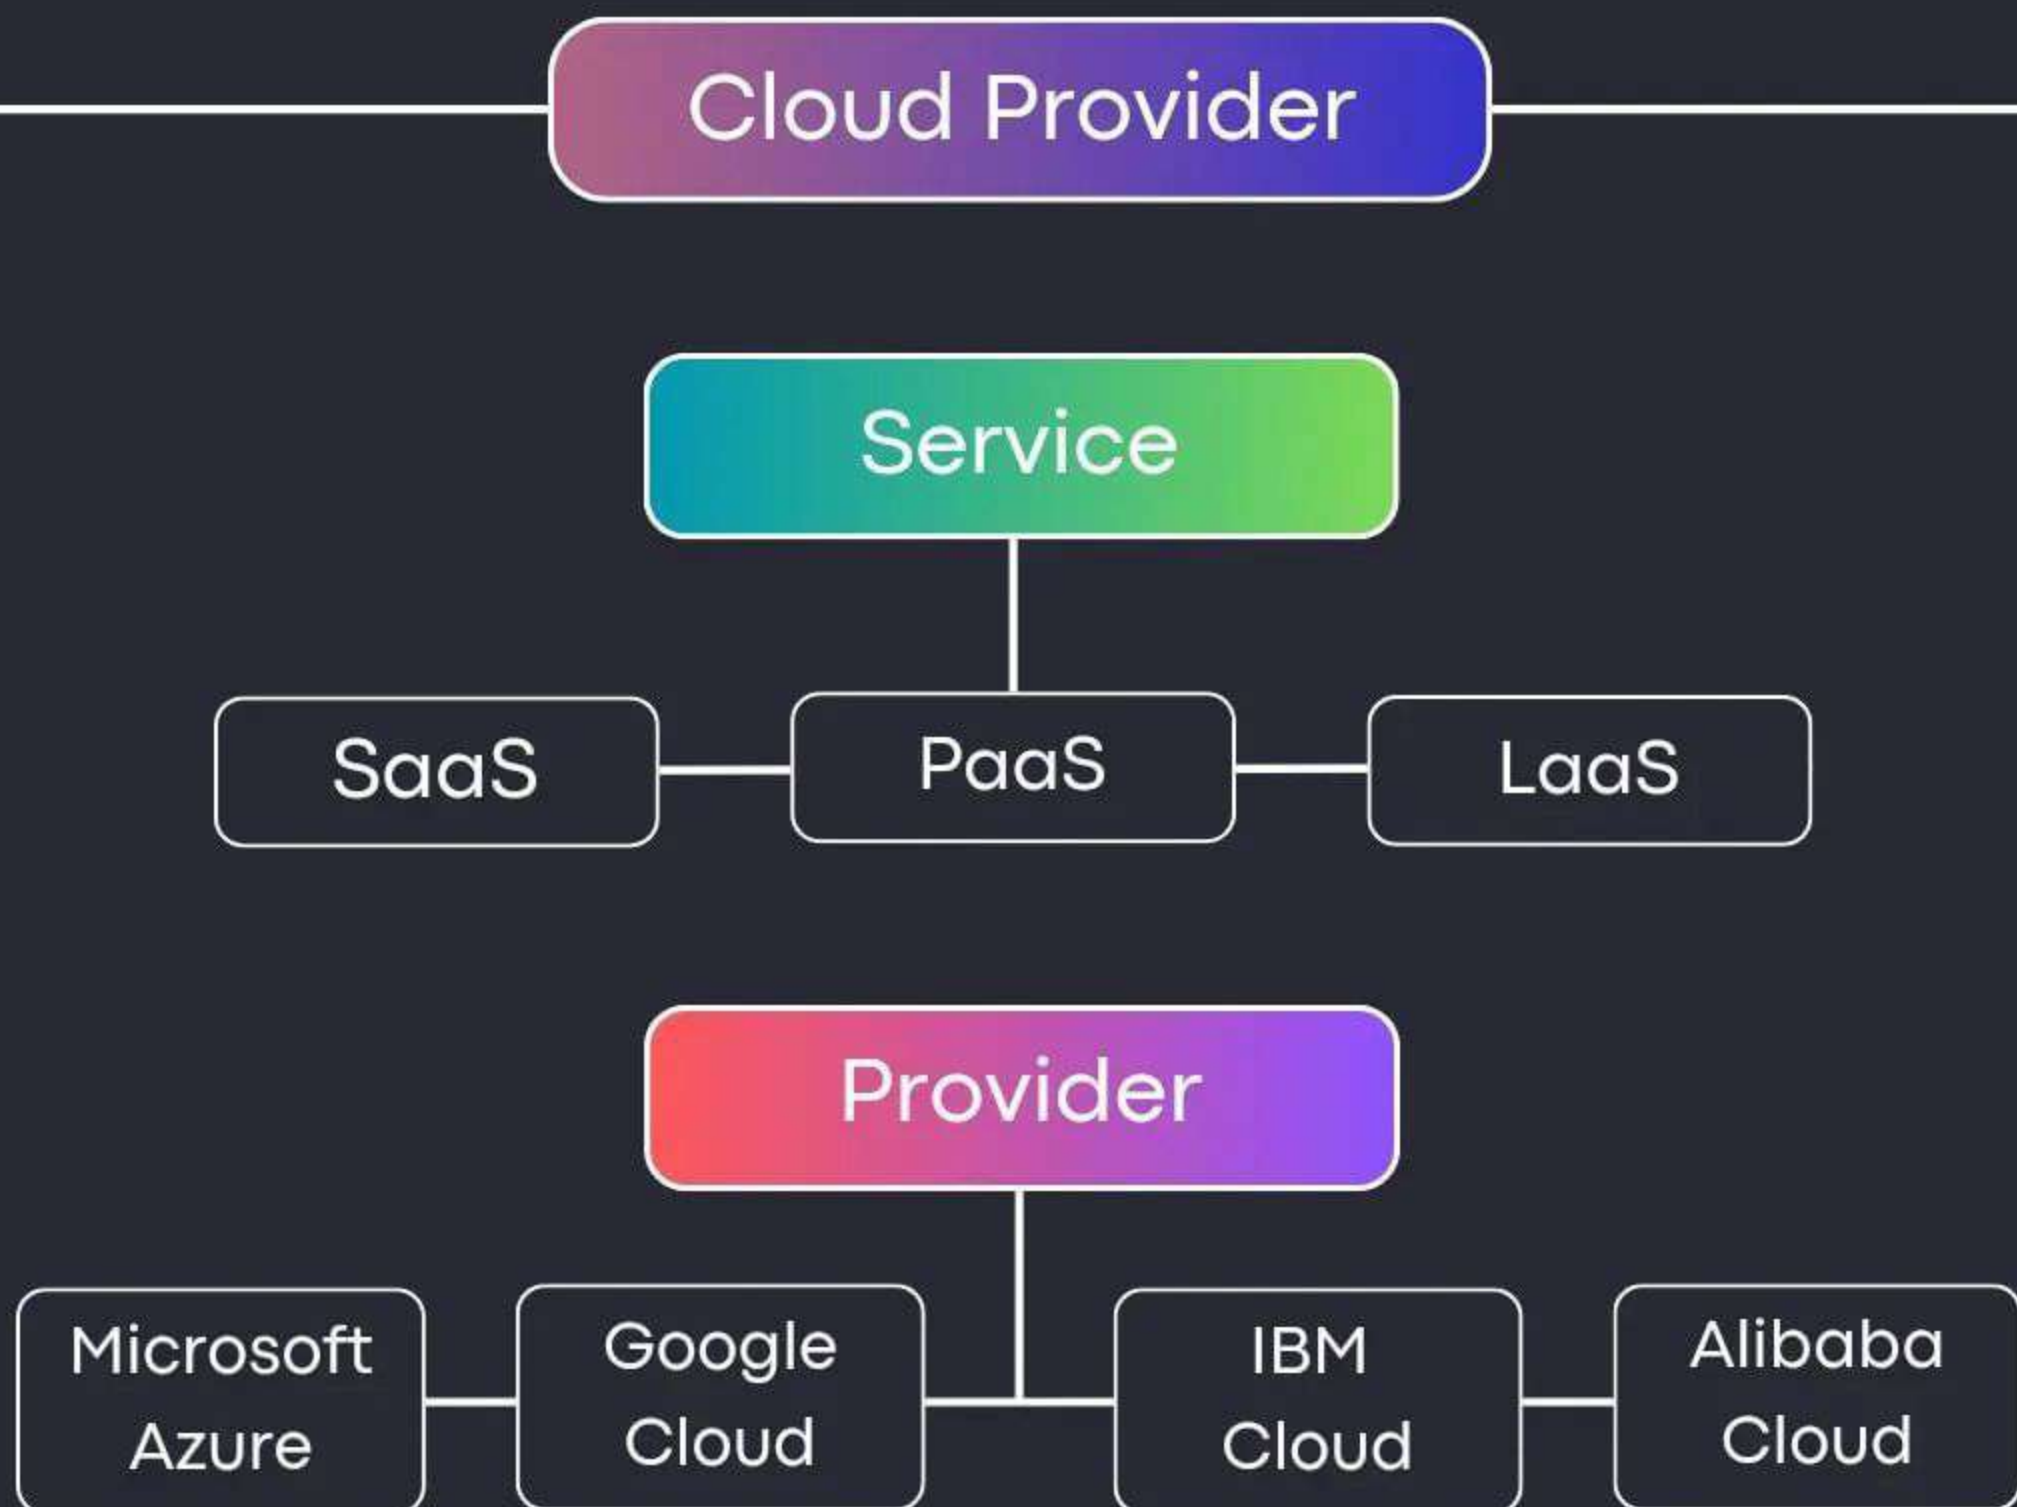

Version Control

- Version control allows you to track changes to your code and collaborate with other developers. Git & Github is the most popular version control system used today.

Officially Made By @coding.stella

- Understand how to use cloud computing platforms such as AWS, Azure, or Google Cloud to deploy and manage your web applications.

THE END !!

Build Projects

Put your knowledge into practice by building fullstack applications. You can start with simple projects and gradually increase their complexity.

Stay up to Date

The field of software development is constantly evolving, so it's important to stay up-to-date with the latest trends and technologies. Attend conferences, read blogs, and join online communities to keep learning and growing as a fullstack developer.
