#2 UI Design Daily

<https://uidesigndaily.com/>

UIDesignDaily.com is a valuable resource for UI/UX designers, providing daily inspiration, free resources, and a diverse collection of UI components and templates.

The screenshot shows the homepage of UIDesignDaily.com. At the top, there's a navigation bar with 'UI Design Daily' on the left and links for 'Designs', 'About', 'License', and 'Contact' on the right. Below the navigation is a search bar with a magnifying glass icon and the word 'Search'. To the right of the search bar are several circular icons representing different design tools or categories, followed by a 'Filter by tags' button. The main content area features a grid of four rows of UI designs. The first row contains: 'Ventana Web App UI Kit FOR FIGMA' (a dark-themed kit for Figma), 'Billing Page' (a light-themed page with a red header and various sections like 'Billing', 'Transactions', and 'Statements'), 'Blog Component' (a pink-themed component with a sidebar and a main content area), and 'Enter Password' (a light-themed password input screen). The second row contains: 'Ventana UI Kit' (described as a 'Sponsored' kit for Figma), 'My Parameters' (a dark-themed settings page with a sidebar and a main form), 'Followers' (a light-themed social media follower stats page), and 'Search for a rental car' (a light-themed search interface for car rentals). The footer of the page includes links for 'Terms & Conditions' and 'Privacy Policy', along with copyright information '©UIDesignDaily 2020' and social media icons for Twitter, LinkedIn, Facebook, and YouTube.

#3 Rodmap.sh

<https://roadmap.sh/>

Roadmap.sh is a web platform offering learning roadmaps for various career paths in technology, guiding individuals on how to acquire skills and knowledge in their chosen field.

The screenshot shows the homepage of roadmap.sh. At the top, there is a navigation bar with links for 'Roadmaps', 'Best Practices', 'Questions', 'Teams' (marked as NEW), a search bar, 'Login', and a 'Sign Up' button. A banner below the navigation bar announces 'Announcing roadmaps for teams. Learn more!' Below this, the main heading is 'Developer Roadmaps'. A sub-section titled 'Role based Roadmaps' contains a grid of cards for various developer roles: Frontend, Backend, DevOps, Full Stack, Android, PostgreSQL, AI and Data Scientist (marked as NEW), Blockchain, QA, Software Architect, ASP.NET Core, C++ (marked as NEW), Flutter, Cyber Security, UX Design, and React Native. A button at the bottom of this section says '+ Create your own Roadmap'. At the very bottom, there is another section titled 'Skill based Roadmaps'.

#4 CodeSandbox

<https://codesandbox.io/>

CodeSandbox is an online code editor for collaborative web development, supporting multiple languages and building production-ready web apps.

The screenshot shows the CodeSandbox homepage with a dark background. At the top, there's a navigation bar with links for Features, Use Cases, iOS, Discover, Docs, Support, Blog, and Pricing. On the right side of the nav bar are Sign In and Try for free buttons. A banner at the top right says "Introducing Dev Container Support: Run any dev environment on CodeSandbox, no matter how complex." with a "Learn more" link. The main feature highlighted is "Instant dev environments" in large yellow text. Below it, a paragraph states: "CodeSandbox keeps you in flow by giving you cloud development environments that resume in 1 second." To the right, there are sections for "Repositories" (with a "Import repository" button), "Sandboxes" (with a "Create sandbox" button), and supported frameworks like React + Vite, Next.js, Vue + Vite, Angular, Nuxt, SvelteKit, Remix, Gatsby, Astro Blog, and Next.js Comm.

□ Features Use Cases iOS Discover Docs Support Blog Pricing

New Introducing Dev Container Support: Run any dev environment on CodeSandbox, no matter how complex. Learn more

Instant dev environments

CodeSandbox keeps you in flow by giving you cloud development environments that resume in 1 second.

Repositories
Build production-ready projects with your team.

#5 Snappify

<https://snappify.com/>

Snappify is a tool that helps developers create and share beautiful code snippets. It also allows developers to create animated code snippets.

The screenshot shows the Snappify homepage with a dark background. At the top, there's a navigation bar with links for Pricing, Use Cases, Product, Resources, Dashboard, Editor, and a user profile icon. The main headline reads "We enable developers to create stunning visuals". Below it, a callout box says "New! - Experimental Video Export" and features a "Get started - It's free" button. To the right, there's a large graphic of a computer screen displaying a "hello-world.js" file with the code `function helloWorld() { console.log('Hello World!'); }`. The screen is overlaid with a red circle, a green hexagon, and a yellow triangle. At the bottom, there's a row of developer logos for vendure, jina, Textualize, chakra, and supabase, along with a "Join a community of 20k+ developers spicing up their content" link and a "Trusted by industry leaders around the globe" section.

#6 Omatsuri

<https://omatsuri.app/>

Omatsuri is a collection of useful web development resources tools including gradient generator, SVG to JSX, colors shades Generator and many more.

The screenshot shows the Omatsuri app interface with a dark theme. At the top left is the logo 'Omatsuri' with a painter icon. At the top right is a button for 'This project is open source' with a GitHub icon. Below the header, there are six cards, each representing a different tool:

- Triangle generator**: Generates CSS triangle styles for elements and pseudo-elements. It features an icon of a yellow triangle ruler.
- Color shades generator**: Generates tints and shades of a given color. It features an icon of a color palette.
- Gradient generator**: Generates linear and radial CSS gradients. It features an icon of a purple gradient bar.
- Page dividers**: Tool to generate page dividers with CSS and SVG images. It features an icon of a computer monitor with a red-to-white gradient bar.
- SVG compressor**: Compresses SVG images with SVGO tool, converts to React component immediately after if needed. It features an icon of a computer monitor with an SVG file icon.
- SVG → JSX**: Converts SVG icons and illustrations to React components or components for other libraries with JSX support. It features an icon of two hearts, one orange and one purple, with arrows pointing from an SVG icon to them.
