Next ➡

Clear All Cookies

You can clear all the cookies stored by the application by setting their expiry date to a date that has already passed.

```javascript
const clearCookies = document.cookie
  .split(';')
  .forEach(
    (cookie) ⇒
      (document.cookie = cookie.replace(/^ +/, '')
                    .replace(/=.*/, `=;expires=${new Date(0)
                    .toUTCString()};path=/`))
  );
```

Reverse a String

You can reverse a string in one line using split, join, and reverse methods.

```javascript
const strReverse = str ⇒ str.split('').reverse().join('');

strReverse('CodeClash');
// hsalCedoc
```

Scroll to the Top

You can scrolll to the top of the page in Javascript using scrollTop() method.
It accept the X and Y coordinates of the positon javascript should scroll top.

```javascript
const toTop = () => window.scrollTo(0, 0);
```

NEXT →

Generate a Random Hex

This mehod generates a radom hex code using Math.random() and padEnd().

```javascript
const hexClr = () =>
  '#' +
  Math.floor(Math.random() * 0xffffff)
    .toString(16)
    .padEnd(6, '0');

console.log(hexClr())
```

Capitalise a String

Javascript doesn't have an inbuilt capitalise function, so we can use the following code of the purpose.

```javascript
let str = 'follow codeclash for learning web development';
let capStr = str.replace(/\w\S*/g, (w) => (w.replace(/^\w/,
                              (c) => c.toUpperCase())
                ));

console.log(capStr);
```

NEXT →

Copy to Clipboard

Easily copy any text to clipboard using navigator.clipboard.writeText.

```javascript
const copy = (text) ⇒ navigator.clipboard.writeText(text);

copy('Code.Clash');
```
